

Metropolitan Transit Authority — Annual Report FY2024

Prepared by Office of the Chief Executive

Executive Summary

Fare revenue covered 31 percent of operating expenses, with the remainder funded by the regional sales tax. The agency completed track renewal on 14 miles of the Blue Line, reducing slow zones by a third. Electric bus procurement continued with 42 vehicles delivered and charging infrastructure installed at two depots. Accessibility upgrades added elevators at four stations under the systemwide accessibility program. Ridership on the metropolitan bus network recovered to 87 percent of pre-pandemic levels during the fiscal year.

Ridership on the metropolitan bus network recovered to 87 percent of pre-pandemic levels during the fiscal year. The capital program remains constrained by escalating construction costs and a projected funding gap in the out-years. On-time performance for heavy rail averaged 91 percent, up two points year over year. Ridership on the metropolitan bus network recovered to 87 percent of pre-pandemic levels during the fiscal year. Fare revenue covered 31 percent of operating expenses, with the remainder funded by the regional sales tax.

Operations and Performance

On-time performance for heavy rail averaged 91 percent, up two points year over year. Ridership on the metropolitan bus network recovered to 87 percent of pre-pandemic levels during the fiscal year.
